

More compact, lighter, cleaner and even more efficient.

For use in sealed heating and cooling systems. Dirt separators protect the boilers, pumps and fittings from damage caused by the deposit of dirt particles. Dirt separators also offer benefits in the event of application in old systems or when an open system is converted to a closed system.

Prevents deposit of dirt particles in the boiler. The removal of dirt particles from the system water extends the service life of pumps, control equipment and other system accessories. The Flamco Clean Smart dirt separators remove even minuscule dirt particles from the system water. They are virtually maintenance-free and the flow resistance is negligibly low.

Advantages

- 60% better performance compared to conventional separators.
- Flow velocity up to 3 m/s.
- Four neodymium supermagnets are incorporated into the logo.
- Can be used with all kinds of pipework.
- Compact dimensions, light weight.
- Extremely low flow resistance and low loss of energy.
- Consistent performance throughout its service life.

Technical Specifications

- Materials: brass and high-quality plastic.
- Minimum/Maximum working temperature: -10 °C / 120 °C.
- Minimum/Maximum system pressure: 0,2 bar / 10 bar.
- Suitable for addition of glycol-based anti-freeze up to 50%.
