

SEPP Eis frost-resistant outdoor tap with handle

3185996 (type **8041**)

The SEPP-Eis is a frost resistant exterior tap that does not drip after closing. During freezing the additional volume will be absorbed automatically in the wall-tube, thus avoiding frost damage to the tubing system. The exterior tap is suitable for single and isolated walls as well as plastered walls. The SEPP-Eis can be mounted very fast due to the use of a tectite push-connection.

- available with handle or key
- does not drip after closing
- simple and fast installation due to use of push-connection
- Kiwa and DVGW approval
- containing a "bucket hook"
- insulated wall-tube for optimal protection
- wall thickness between 135 and 500 mm

Product Information

Article	SEPP Eis frost-resistant outdoor tap with handle
Article number	3185996 (04018422305371)
Productcode	0210810 (04018422029598)
Part of article group	8041 - SEPP Eis frost-resistant outdoor tap
Size	R1/2xG3/4 (DN15) Cr
Item weight	2.28 kg
l x w x h	654x94x134 mm
Packaging	carton (1 pce)

Characteristics

Colors	chrome
Materials	brass
Manufacturer	Seppelfricke
Shape	Perpendicular
Producttype	facade taps
Connection type	G - male thread gas cylindrical (BSPP)
Sealing	EPDM

Technical specifications

Max. operating pressure	10 bar (liquid)
Max. temperature	90°C

General

Category	taps
ETIM class	EC011378 Outdoor faucet
Intrastat code	84818019
